

Crystal Report Developer/Writer

We are seeking an experienced Crystal Report Developer/Writer to add to our growing team. This position is responsible for the completion of client's month end reporting packages, as well as ad hoc reports. They will also be responsible for maintaining a strong knowledge base of Excel and Crystal. Work is performed under general direction and considerable latitude for independent judgment.

Responsibilities:

- Develop new Crystal Reports from scratch based on a complex proprietary database structure
- Update existing reports while ensuring backwards compatibility
- Work both independently and as part of an Agile (SCRUM) development team
- Maintain and ensure delivery of scheduled reports
- Work closely with internal users to establish detailed requirements
- Assist in delivery of client monthly reports
- Develop client specific reports while working closely with the on-boarding team
- Performs additional duties as assigned

Qualifications:

- Bachelor's Degree preferred
- 5+ years' experience with crystal reports, data analysis, and report writing
- Ability to write SQL queries with complex joins
- Ability to adapt to changes and work in a fast-paced team-oriented environment
- Ability to multi-task effectively
- Ability to identify and improve inefficiencies
- Ability to take ownership of a project and follow it through to completion
- Strong troubleshooting, problem solving and analytical ability
- Excellent written and verbal communication and organizational skills
- Experience with Power BI is a plus
- Experience with Oracle DB is a plus
