

SQL Developer

SQL Developer

We are looking for a SQL developer who will be responsible for designing database components while ensuring their stability, reliability, and performance. He or she will design and develop tables, PL/SQL procedures, functions and ETL jobs with optimized processing time. They will also communicate with the team and internal staff regarding design specifications, system limitations and best practices.

Duties & Responsibilities:

- Work both independently and as part of an Agile (SCRUM) development team
- Analyze User Requirements and translate into database requirements
- Design and develop complex PL/SQL objects, reports and programs
- Design and develop reports against Oracle databases
- Develop and maintain an enterprise data model of all production database applications
- Analyze performance issues and provide recommendations based on testing results
- Proactively diagnosing and resolving problems affecting database
- Maintaining database configurations in compliance with release management and change management policies
- Participate in special projects and performs additional duties as required

Knowledge, Skills & Abilities:

- Bachelor's degree preferred
- In-Depth knowledge of advanced PL/SQL features such as Bulk binding, complex functions: analytical, pipelined, hierarchical.
- Excellent understanding of RDBMS Concepts
- Highly proficient with Oracle PL/SQL complex coding
- Expertise in Performance Tuning
- Experience with Oracle specific tools and utilities such as TOAD, PL/SQL Developer or SQL Developer
- Experience in Data Modelling and Data Migration
- Experience with version control tools such as "Git"
- Hands-on experience with Technical Design & Development of Database modules and components such as database packages and procedures etc.
- Hands-on experience with Coding, Code Reviews & Unit Testing · Reviewing and tuning SQL and PL/SQL code
- Innovative approach with focus on continuous improvement
